ABSTRACT

Forex is an alternative type of highly liquid investments. The liquidity level and price acceleration that occurs in the forex could close the transaction quickly and profit level exceeded the average trade in general. However, rapid price movements in the forex also cause a high degree of volatility that the forex became a very risky investment so it is difficult to maximize profit. Researchers use hedging techniques to drive price movement suddenly turned around and indicators of Bill Williams to analyze price movements that would happen to occur in the future.

This research used qualitative destructive analysis to see that the hedging technique and Bill Williams Indicator could maximize forex investment profit. The study was conducted for five months starting from the date of July 1, 2014 until November 30, 2014, through Octa FX service.

Researcher got a margin call when run hedging technique in the first time. Researcher modified hedging techniques after knowing its weakness. And finally the problem of hedging techniques was resolved. Collaboration between hedging techniques and Bill Williams indicators could maximize profits in forex investment.

Keywords: hedging, Bill Williams indicator, investment, forex.
